SUMMARY

Software Engineer (BCA 2026, CGPA 8) with hands-on experience building and deploying production-grade Spring Boot applications with 6+ secured REST APIs and cloud-integrated storage. Proficient in Spring Security, JWT, RBAC, JPA/Hibernate, Kafka, and AWS S3/RDS. Seeking a Backend Developer role to code scalable, high-performance backend systems.

INTERNSHIPS

Techno Exponent *Jun 2025 – Aug 2025*
Data Analytics Intern · Kolkata

- Developed SQL queries to extract and transform relational data, reducing manual data preparation effort.
- Processed and cleaned 10,000+ records using Python (Pandas, PyMongo), improving dataset accuracy for downstream analytics reports.

PROJECTS

SpendSnap – *Aug 2025 – Sep 2025*
Spring Boot, MySQL, JPA/Hibernate, Thymeleaf, Cloudinary, Google Gemini API, Docker

- Optimized JPA/Hibernate queries using DTO projection patterns across 6+ REST API endpoints, reducing average API response payload size and improving throughput under concurrent load.
- Implemented centralized exception handling via @ControllerAdvice, standardizing REST error responses across all endpoints and reducing debugging time.
- Deployed the application on Koyeb, configured environment variables, and synchronized the database schema.
- Integrated Google Gemini's vision model to extract the amount, date, merchant, and suggested category from receipt images, with user review required before saving the extracted data.

RestroCloud *Apr 2026 – Jun 2026*
Spring Boot, Spring Security, JWT, MySQL, JPA/Hibernate, React JS, Swagger

- Implemented stateless JWT-based authentication and role-based authorization for three roles: Admin, Waiter, and Kitchen, securing 15+ API endpoints.
- Modeled 5+ core business entities (Orders, Tables, Payments, Menus, Sessions) using JPA/Hibernate with optimized relational mappings and enum-based state management.
- Built paginated and filterable REST APIs with microservices-oriented modular architecture, supporting an estimated 50+ concurrent sessions.
- Implemented Redis-based OTP verification with OTP hashing.

SKILLS

Languages	Java (8/11/17), SQL, Python, HTML
Frameworks	Spring Boot, Spring Security, Spring Data JPA, Spring MVC, Hibernate (ORM), Flask
Data	MySQL, MongoDB, Redis (familiar), AWS (S3, RDS), Cloudinary
Tools	Maven, Git/GitHub, JUnit, Postman, Apache Kafka, Linux Shell, UNIX
Concepts	Microservices Architecture, OOP, SDLC, Exception Handling, Unit Testing, DSA, Debugging, Agile
API & Documentation	RESTful API Design, API Versioning, Swagger/OpenAPI, JWT Authentication, RBAC, DTO Patterns
Generative AI	Google Gemini API (Vision), Prompt Design, LLM-based Data Extraction

EDUCATION

Bengal School of Technology & Management, affiliated with MAKAUT *Aug 2023 – Aug 2026*
Bachelor of Computer Applications (BCA) · Kolkata

CGPA: 8/10
